

# Linux Bash Homework

1. Please write a Bash script that receives a folder path and it prints the largest 10 files in this folder in ascending order. (Check the **ls** and **du** commands)
2. Please write a Bash script that calculates the sum of Real used memory in the system and presents the 10 largest memory consumers. (Check the **ps** command: RSS column)

Commands: **awk**, **ps**

Please send the scripts and also a screenshot of the script running.
